

# Kaspersky IoT Secure Gateway

Cyber Immune gateways for connecting  
**TRANSPORT AND LOGISTICS INFRASTRUCTURE**  
facilities to clouds and business systems

- Protection of a transport park critical infrastructure at a city and regional level: tracks, busses, trams and trains including city digital depo
- Analytics and monitoring through cloud IoT platforms of supplying and logistic chains door-to-door including variety of control points, geographical locations and different carries
- Collection and secure transmission of warehousing infrastructure data including all IoT devices inside
- Centralized control and management of AMR/AGV carts protected against hacking

## Additional notes:

- Creation of ecosystem using Kaspersky Lab products such as KISG+KUMA+KSRW+KICS+KSC to provide an end-to-end protection of a production line
- Centralized management of Kaspersky Lab products via Kaspersky Security Center
